

WHAT IS SHAPE BHAM?

Shape Bham is an initiative that brings academic trained researchers and city planners, alike, to translate research into practice, and to integrate health and equity into the Birmingham City planning process at the neighborhood level. As part of this endeavor we will pilot 20 neighborhood health report cards for 20 of Birmingham's 99 neighborhoods, with the intention of eventually replicating the report cards for the remaining 79 neighborhoods, pending available funding at later date.

WHAT ARE THE SOCIAL DETERMINANTS OF HEALTH?

The social determinants of health are the conditions in which people are born, grow, live, work and age. These circumstances are shaped by the distribution of money, power and resources at global, national and local levels. The social determinants of health are mostly responsible for health inequities - the unfair and avoidable differences in health status seen within and between countries.

RECOMMENDATIONS.

Some of the indicators your neighborhood received a rank between 15-20 include: Household Transportation Costs, Pedestrian Connectivity, Age of Housing, Access to Parks and Open Space. Poor ranks in these indicators are linked to increased incidences of the following:

- Participate in Programs ran by the National Recreation and Park Association.
- Include community members in Parks and Recreation Boards.
- Host workshops to help individuals calculate their housing and transportation costs.
- Adopt Pedestrian Safety Plans within all communities.
- Distribute and Install Smoking Detectors.
