

WHAT IS SHAPE BHAM?

Shape Bham is an initiative that brings academic trained researchers and city planners, alike, to translate research into practice, and to integrate health and equity into the Birmingham City planning process at the neighborhood level. As part of this endeavor we will pilot 20 neighborhood health report cards to for 20 of Birmingham's 99 neighborhoods, with the intention of eventually replicating the report cards for the remaining 79 neighborhoods, pending available funding at later date.

WHAT ARE THE SOCIAL DETERMINANTS OF HEALTH?

The social determinants of health are the conditions in which people are born, grow, live, work and age. These circumstances are shaped by the distribution of money, power and resources at global, national and local levels. The social determinants of health are mostly responsible for health inequities - the unfair and avoidable differences in health status seen within and between countries.

Some of the indicators your neighborhood received a rank between 15-20 include: *Age of Housing, Public Assisted Households, Reading Proficiency, and Walkability.* Poor ranks in these indicators are linked to increased incidences of the following:

- Partner with local non-profits to donate cars to welfare beneficiaries who are seeking employment.
- Establish early childhood programs, focused on reading.
- Create walkable neighborhoods.
- Distribute and Install Smoking Detectors.
